Subject: RE: CPG Request to Modify Air Monitoring Frequency

Stan,

I am going through this request.

Is there a meeting tomorrow? We could discuss this then, if not, I'll still be on-site in the morning.

Subject: CPG Request to Modify Air Monitoring Frequency

Mike and Stephanie,

Attached is a technical memorandum providing the air monitoring results to date. The data demonstrate that air quality has not been affected by dredging operations, CPG requests that COPC sampling frequency be reduced immediately to one round of sampling per week. Furthermore, CPG requests modification of the air monitoring plans during capping to consist of only dust monitoring.

Please contact me if you want to discuss any aspect of this request.
